

Sanitary partition walls for Kindergartens SVF30 KIGA Mix&Match

Made of 30 mm thick chipboard

schäfer[®]
Trennwandsysteme

Stylish and elegant partitioning.

 SAFELY TESTED
that's us!

Maximum safety and stability and the use of unbreakable materials are the basic characteristics of our sanitary products for kindergartens. The integrated finger pinch protection fulfils the safety regulations of the GuV and the TÜV-tested quality confirms the safety of our products manufactured in Germany.

 RICH IN EXPERIENCES
that's us!

Bright colours, cheerful motifs and playful elements are a natural part of children's everyday lives. This is the only way for little people to learn, experience and develop. With our child-friendly toilet partition wall designs, the youngest ones are playfully immersed in exciting themed worlds. Every trip to the toilet becomes a real highlight with a learning character and joy of discovery!

 HYGIENIC
that's us!

The surface finish of the materials used makes it possible to keep our KIGA WC partitions hygienically clean. Cleaning agents with disinfecting properties can be used without hesitation and also prevent the spread of dirt and germs. For hygienic and clean sanitary rooms everywhere.

 EASY-CARE
that's us!

Thanks to their easy maintenance and easy cleaning, our KIGA toilet partitions are the perfect companions in everyday kindergarten life. Due to the material composition, the partition systems can be cleaned quickly and efficiently. The maintenance-free construction of our toilet partitions type KIGA speaks for itself.

BEFORE WE
EXPECT TRUST FROM
OUR CUSTOMERS,
WE PROVIDE EVIDENCE
that's us!

ENVIRONMENT & SUSTAINABILITY *that's us!*

Sustainable management and careful use of resources are a matter of course for us and part of our corporate philosophy. This basic idea is consistently integrated and lived in our work processes. We are proud to be the first certified manufacturer of partition systems and lockers in Germany to operate according to the FSC™ and PEFC guidelines.

PEFC - registered

We pay attention to a sustainable supply chain in which our products are procured under ecological, economic and socially just aspects.

FSC™ - certified

As the first certified manufacturer in the area of partition systems and lockers in Germany, we make an active contribution to the protection of our earth with this future-oriented procurement method. We supply almost our entire range from sustainable wood in accordance with the specifications of the FSC™.

Interesting facts about SVF30 KIGA Mix&Match

- Colours of fronts, profiles, hinges and handles are chosen and combined according to the customer's individual requirements
- Made of 30 mm thick chipboard
- ABS strips and panels in the same colour or as a colour accent in another colour
- Suitable for dry areas
- Wide range of colours available
- System will be produced acc. to the building site dimension
- Safety ring handle: simple and safe to use
- Finger protection on hinge and closing side in accordance with GUV safety regulations
- Made in Germany

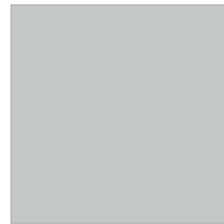

Since a stabilising head rail is not used for kindergarten partitions, additional aluminium brackets are attached to the partition connections of the front as well as to the brick wall. In order to ensure the stability of the system, the feet are attached by force-fitted screwing with a drilling depth of 50 mm.

- Made of unbreakable and easy-care nylon
- Construction in accordance with GUV safety regulations
- Colour selection according to colour chart

Finger protection:

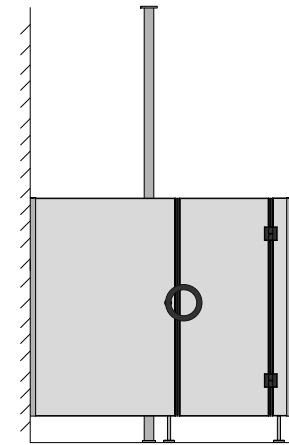

- Finger protection on hinge and closing side in accordance with GUV safety regulations

Cubicle system

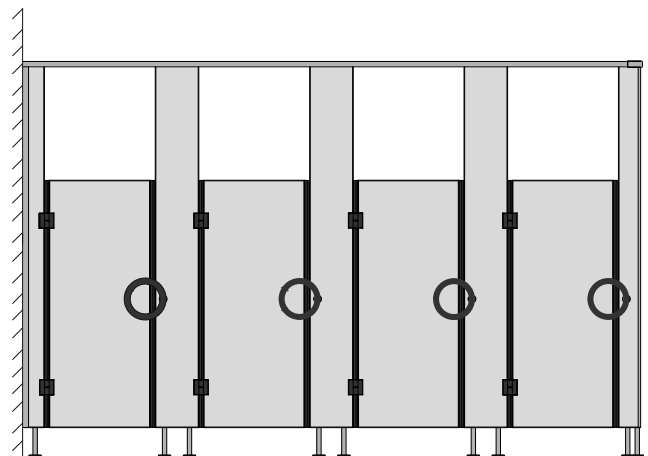

Solution for stabilisation of wide fronts

Broad front sections can be stabilised by an aluminium tube which extends to the ceiling.

Kindergarten cubicles with high front elements

z.B. 600 mm

z.B. 1.250 mm

z.B. 2.000 mm

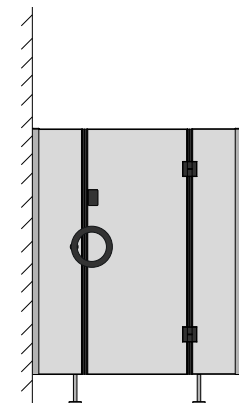

150

Due to their low height kindergarten cubicles generally do not have a stabilising upper section.

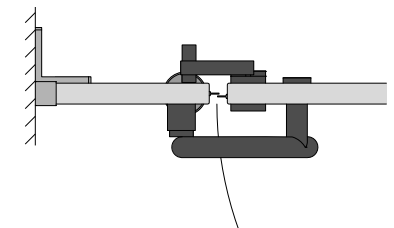

A tried-and-tested variant is therefore the implementation of the front section at a height of 2.000 mm, so that an upper profile can be extended over the front for stabilisation purposes.

For installations with a height of more than 1,600 mm to the top edge of the door, the design shown here is mandatory.

Locking device

If required a door lock can be fitted. This is arranged in such a way that nursery staff can reach over the door to unlock it in an emergency.

We reserve the right to make technical alterations.
