BEFORE WE EXPECT TRUST FROM OUR CUSTOMERS, WE PROVIDE EVIDENCE

that's us!

ENVIRONMENT & SUSTAINABILITY

that's us!

The responsible use of resources is an integral part of our business processes. When selecting materials and suppliers, we take environmental, economic and social considerations into account.

As a manufacturer of toilet partition systems and locker units in Germany certified according to FSC™ and PEFC standards, we offer selected products and configurations using certified wood-based materials. These certifications verify compliance with defined requirements for the traceability of materials within the respective certified chain of custody.

PEFC Certified: PEFC is a certification system that promotes sustainable forest management. By using PEFC-certified materials, we support a documented and controlled supply chain that complies with PEFC requirements.

FSC™ Certified: FSC™ is an international certification system for responsible forest management. A large part of our product range is available, upon request, with FSC™-certified wood-based materials. FSC™ certification ensures the traceability of the materials used within the certified chain of custody.

The mark of responsible forestry

On request the products are available with FSC™ certification

CERTIFIED EPDs

that's us!

As the first manufacturer of toilet partition systems to offer **certified Environmental Product Declarations (EPDs),** we provide verified environmental data for various product groups within our portfolio:

Sanitary partition systems made of glass
Sanitary partition systems made of chipboard
Sanitary partition systems / furniture made of HPL
Sanitary partition systems made of sandwich panels

Our EPDs provide reliable and standardized environmental information covering the entire life cycle of each product, from raw material extraction through to disposal. This gives architects, planners, and building owners a sound data basis for their planning and assessment processes.

The EPD data provided can be taken into account in building certification systems such as DGNB, LEED, and BREEAM.

Our goal is to combine high product quality with transparent and verifiable environmental information. Through our certified EPDs, we provide robust product data to support the planning and evaluation of construction projects.

kiwa VERIFIED EPD ISO 14025 EN 15804

PREQUALIFIED

that's us!

We are registered in the list of prequalified construction companies with the number 010.049740, proving that we are qualified for the products and services we offer.

PQ VOB

MADE IN GERMANY

that's us!

Our products are manufactured for you at the company site in Horhausen, Rhineland-Palatinate. This is the only way we can guarantee the high quality standards we set for our products.

Environmental responsibility and certifications

Efficient use of resources, as well as the use of certified materials and documented environmental information, are integral parts of our business processes.

Examples include:

- The separation of recyclable materials by type wherever possible and their reintegration into the recycling cycle.
- Electricity generation through the company's own photovoltaic system, reducing dependence on external energy sources
- The energetic utilization of wood waste generated during production in the company's own heating system to heat our facilities
- The availability of nearly the entire Schäfer product range made from sustainable wood in accordance with the requirements of the FSC™ standard (FSC-C147242). For selected products, materials from FSC™-certified supply chains are available. Certification documents compliance with FSC™ requirements throughout the certified chain of custody
- As a PEFC partner (PEFC/04-31-3143), we comply with the requirements of the PEFC standard within the certified chain of custody. By participating in the PEFC system, we support the procurement of wood products sourced from PEFC-certified forests and supply chains
- As the first manufacturer of sanitary partition systems, Schäfer Trennwandsysteme has obtained certified Environmental Product Declarations (EPDs) for various product groups within our portfolio:
  - Sanitary partitions made of chipboard
  - Sanitary partitions made of sandwich panels
  - Sanitary partitions made of glass
  - Sanitary partitions and furniture made of HPL

Our goal is to combine high product quality with transparent and verifiable environmental information. Through our certified EPDs, we provide reliable product data to support the planning, assessment, and certification of construction projects.

Competence

schäfer®
Trennwandsysteme

Stylish and elegant partitioning.

We believe in automation because automation creates:

- Consistent quality
- High-precision fitting accuracy with different materials
- Jobs
- Competitiveness
- Intelligent and individual product solutions
- More qualified employees

Over the years, automation has created additional jobs and enabled the professional development of our employees.

Employees

schäfer®
Trennwandsysteme

Stylish and elegant partitioning.

Employees

- People are the most important capital of our company. We are proud of that!
- One of the main components is the training of young employees
- Which we strengthen in their self-responsibility from the beginning of the their apprenticeship and support with independent tasks
- We do this with success, because many of our former trainees are valuable employees of us today

We attach great importance to the team spirit of our employees. We work hand in hand. This is the only way we can accompany our customers professionally throughout the entire realisation process. This makes us to the reliable partner which we are.

- 120 employees in Horhausen
- 30 consultants and 40 installation teams throughout Germany
- These are the people at Schäfer Trennwandsysteme
